## **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

The claims are allowable over the cited prior art because the prior art does not teach, disclose nor make obvious the claimed method to modulate vascular tone in a male patient having compromised vascular tissue associated with erectile dysfunction or treating erectile dysfunction comprising administering to the male patient a pharmaceutically acceptable salt thereof.

After a careful search of issued patents and relevant commercial databases, no references were found that would either anticipate or make obvious applicant's claimed invention. Although it was known at the time of applicant's invention that the claimed compounds were useful for treating cancer and, the prior art is silent with respect to modulating vascular tone in a male patient having compromised vascular tissue associated with erectile dysfunction.

The cited prior art, Delaney et al. teach the employment of tamoxifen for the treatment of cancer and that during the middle portion of the treatment period, the patient expired increased libido. However, there is lack of cause-and-effect relation between administration of tamoxifen and the effects observed by Delaney et al. because the libido is not co-extensive with the period of time. (see Applicants' brief page 9-10). Therefore, this reference does not anticipate or make obvious the instant methods as claimed.

Accordingly, this Application is allowed to issue.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
